

MailASail Automatic Weather Responder

About:

This weather service is a simple system to offer popular weather forecasts and charts by email.

Our goal is to provide a deliberately limited subset of all the weather available, and only to provide the most useful forecasts in an easy to access format. If you would like to see additional charts or forecasts added then please email: support@mailasail.com

Usage:

Send a blank message with the data filename as the ONLY word in the SUBJECT line to: weather@mailasail.com

The datafile will be sent back immediately

NOTE: Filenames are CaSe SeNsItIvE

In most email programs clicking on the links in the text below will create a new email with the correct subject line

GRAPHIC WEATHER CHARTS / SYNOPTICS

Note: These may take 2-4 mins to download over Iridium

REDUCED SIZE WEATHER CHARTS

The resolution and quality are reduced, but the size drops to between 1/2 and 2/3 of the original (ie faster to download)

USE WITH CARE. Understand the implications of trading filesize versus picture quality
